

## Transfer Conveyor

This PVC conveyor belt is designed for light industrial and assembly line applications, featuring excellent wear resistance and stability. The setup includes a reduction motor, frame, workbench, and high-quality green industrial belt with adjustable speed, suitable for a variety of conveying needs.

### Features

- **Durable Design:** Built with a stainless steel frame and high-quality PVC belt, ensuring robust construction suited for various environments.
- **Adjustable Speed:** Equipped with a variable frequency speed control motor to adapt the conveyor speed to your needs.
- **Efficient and User-Friendly:** Easy to install and maintain, this conveyor belt is ideal for continuous conveying operations, enhancing production efficiency.

### Parameter

<b>Total Length</b>	5 meters
<b>Speed Control Motor</b>	Taibang motor, power 0.4KW, variable frequency control, speed range 0-200 rpm
<b>Frame Material</b>	SUS304 Stainless Steel
<b>Workbench Dimensions</b>	Width: 750mm, Side Width: 250mm each; Height: 750mm (adjustable)
<b>Workbench Thickness</b>	1.3mm
<b>Belt Material</b>	Green industrial PVC belt (Netherlands-made), thickness 2mm, belt width 250mm
<b>Additional Features</b>	Adjustable height, durable and easy to install
