

MIC-10C Drop Down Case Packing Machine

In modern industrial packaging, efficiency, speed, and precision are critical for maximizing production output. MIC Machinery introduces the MIC-10C Drop Down Case Packing Machine, a high-performance automatic case packer designed to streamline packaging operations with precision and reliability. With a capacity of 10 cartons per minute, this case packer enhances efficiency while ensuring secure and consistent packaging.

Key Features of the MIC-10C Case Packing Machine

The MIC-10C case packing machine is engineered with advanced automation and user-friendly controls, making it an ideal choice for industries requiring fast and accurate case packing.

Fully Automatic Case Packing – Reduces manual labor and increases productivity.

1. High-Speed Performance – Capable of packing up to 10 cartons per minute with precision.
2. Drop Down Mechanism – Ensures smooth and efficient product placement in cases.
3. Adjustable Case Sizes – Supports various carton dimensions, making it versatile for different products.
4. Heavy-Duty Construction – Built with durable materials for long-term performance.
5. User-Friendly Touchscreen Interface – Easy operation with minimal training required.

Advantages of the MIC Automatic Case Packer

1. Increased Productivity and Efficiency

The MIC-10C case packer automates the entire case packing process, eliminating bottlenecks and improving overall production speed.

2. Reliable and Consistent Packing Quality

With its drop-down case packing system, this case packing machine ensures precise and secure product placement, reducing errors and product damage.

3. Cost-Effective Packaging Solution

By automating case packing, the MIC automatic case packer significantly reduces labor costs and increases packaging efficiency.

4. Versatility for Multiple Industries

Designed for food, beverage, pharmaceuticals, cosmetics, and industrial products, this case packer handles a variety of packaging needs.

5. Compact and Space-Saving Design

The MIC-10C automatic case packer is engineered for seamless integration into existing production lines while occupying minimal space.

6. Easy Maintenance and Operation

With an intuitive touchscreen interface and easy-access components, this case packing machine simplifies maintenance and minimizes downtime.

Technical Parameters

Model	ROY-10C
Power supply	380V,50/60Hz
Power	3.5kw
Capacity	500-600 case/hour
Total weight	1200kg
Air consumption	5-6kg/cm ² 460L/min
