

JSM-1540 Bottle Mouth Heat Shrink Packaging Machine

Features:

1. Suitable for food, medicine, cosmetics, pesticides and other industries: glass bottles, plastic bottles and other containers, with the bottle mouth heat shrinking after labeling
2. All imported components, the heater is made of stainless steel, and the shrinkage temperature is freely controlled
3. The conveying speed is infinitely adjustable by an electronic speed controller
4. Only heat the mouth of the bottle, which will not affect the quality of the contents due to high temperature
5. The whole machine is made of stainless steel or high-strength carbon steel, with a high-quality surface treatment
6. With simple settings and adjustments, it can adapt to containers of various specifications

Equipment parameters

- Model JSM-1540
- Sealing speed Max15m/min
- Maximum bottle mouth diameter 4 inches
- Maximum bottle height 400mm
- Total power 4.0KW
- The total weight of the machine is 90kg
- Dimensions 1500 × 460 × 1435mm
