

YLFXJ-4030 Automatic Electric Heat-Seal Tape Sealing Machine for Cartons Packaging

The YLFX-4030 Semi-Automatic Carton Sealing Machine is a dependable, semi-automated solution engineered for efficient sealing of cartons in small to medium production environments. Featuring dual side drive belts and an automatic tape applicator, it seals both the top and bottom simultaneously, ensuring a fast, smooth, and secure finish suitable for standardized carton sizes.

Constructed with adjustable side and height settings, it adapts quickly to varying box dimensions and supports printed adhesive tapes to enhance product branding. Built with durable materials and designed for easy integration into packaging lines—or as a standalone machine—the FXJ-5050 is widely used across industries including electronics, food, general merchandise. Its practical design offers high sealing speed, cost-effective tape usage, and reliable performance for continuous operations.

Technical Parameters

Model	YLFX-4030
Power	180W
Voltage	110V
Table Height	55-74cm
Sealing Speed	800-1000/hour
Tape Width	3-5cm
Minimum carton sealing range (width*height)	8*4.5cm
Maximum carton sealing range (width*height)	30*40cm
Machine weight	100-110KG
Body size	177*63*(100-130)CM
Export wooden box packaging size	95*69*85cm
Export wooden box packaging weight	120kg
