

SED-14VH-E Type Dry Powder Mixer Machine for Pharmaceuticals

This machine is suitable for mixing dry powders and granular materials in industries such as pharmaceuticals, chemicals, food, feed, ceramics, and metallurgy. It features a V-shaped asymmetric material barrel design that ensures thorough mixing with no dead corners and achieves high uniformity efficiency.

Key Features

- Stainless steel construction for durability and easy cleaning
- V-shaped barrel design for efficient, thorough mixing
- Smooth inner walls prevent material buildup
- Simple operation and maintenance
- Compact dimensions for space-saving installation

Technical Parameters

Model	SED-14VH-E
Total Volume	14L
Capacity	4 kg/batch
Rotating Speed	20r/min
Motor Power	0.55kw
Dimension	780*350*850mm
