

FL-800 Filling-Plugging-Sealing Compact Machine with Unscrambler

FL-800 is an automatic vials feeding & arranging/detecting, filling, and capping machine. It can even handle special vial shapes such as rotundity, flat, and prism-shaped vials. It can also handle many different kinds of stoppers/caps, giving it an edge over other similar machines in the world. It has met all GMP regulations through our company's superior design and manufacturing of non-standard products. It is applicable for eye drops, syrups, pharmaceutical liquids, perfumes, shower gels, shampoos, nail polish lotion and much more.

Features:

- Integrated digital control with PLC/ Touch-screen controls for easy operation.
- User friendly operating system with self diagnostics / solution window.
- High resolution screen for clear view of the control panel.
- Designed with intelligent detection system to detect fallen, mis-positioned bottles and other error situations.
- Mechanical buffer design for reduced wear and redundant operation.
- Variable speed for different production speed.
- DIY design concept for easy disassembly, repair and maintenance.
- Aesthetic outline with perimeter gutter for easy clean up.
- Professional manufacturing techniques using ISO-9001 system.
- Stainless steel and anodized aluminum construction that complies with GMP standards.

Specifications:

Power	1.1KW
Voltage	AC220V
Filling Capacity	60 vials / minute
Dosage	10ml
Operation Air Pressure	0.5~0.7 MPa
External Size	2250 x 880 x 1400 (mm)
Weight	580 Kg
