

Automatic Powder Filling Machine with Turntable and Conveyor APF-50/100/500

We are engaged in supplying the powder filling machine, at Gujarat, India. It is a precise, highly accurate and a user friendly machine. It is manufactured from high quality materials gives it well finished body.

Different types of programs can be set for the operation, as per demand. The digital control system helps to adjust particular measured product as per demand.

The high quality material and focused engineers lead the best quality **powder filling machines**.

- robust construction
- precision control
- flawless operation
- low maintenance
- low power consumption
- anti rust

Technical Data:

Application: Any Type of Dry powder

Contact Parts: Stainless steel

Output: 20-60 Fills/Minute (Depending upon the material characteristic and filling volume)

Filling Volume: 5 Gram to 500 Gram (With Different size of Auger and funnels)

Conveyor: In stainless steel, 6' Length, With Variable Speed.

Air Pressure: 4.5 KG

Power: 3 Phase / 400V 1.H.P. 4 Core wire system.

Hopper Capacity: 30 LTR.

Load Cell: 6 KG.

Machine Dimension: (L) 1885 mm (W) 935 mm (H) 1725 mm

Features:

- Compact Design, Fast Output with timer operating system
- Digital Display panel with production counter
- Contact parts are in stainless steel
- Flexible Guide system of conveyor for different – Size of Containers
- No product no filling system.
- Wide packing range in single compact machine with different size of funnel and auger
- Continues rotation of adjustable stirrer inside the hopper de-aerates to maintain uniform bulk density of the product.
