

Full-Automatic Powder Packaging Machine

1. This automatic packaging machine can automatically complete the functions of automatic measurement, automatic filling, automatic bag making (printable), sealing and fixed package cutting, etc. of multiple product lines;
2. Adopting advanced technology and humanized design, the touch screen control system of "panasonic" PLC+5.7 in Japan is highly automated;
3. Fault self-alarm, self-stopping, self-diagnosis, simple operation, quick maintenance, automatic display of packaging quantity, and convenient statistics of machine workload;
4. Using the operating principle of the heat-sealed bag, the motor controls the film pulling, and the bag drawing is fast and stable;
5. High sensitivity electric eye can be used to automatically track and locate the printing cursor, and complete trademark pattern can be obtained when packaging materials with colored objects;
6. Adopt integral mould frame, making adjustment more convenient;
7. The whole machine is made of 304 stainless steel and aluminum alloy (in accordance with GMP standards);

Technical parameter:

Materiel	Granule
Model	full-automatic
Speed	35-50bag/min
Form	Bag, strip bag
Products	powder
