

Automatic Case Packer (Vertical Type) JP-C-01

Electric packer machine is of intelligence automation equipment, it adopts P.L.C control, and touchable screen control, with ultrahigh depart device to pack all kinds of container, plastic bottle, regular and irregular bottles, and other packed boxes with extra boards. The bottle pins seize the bottle and relax in the carton. It is widely used within production line for it has reduced labor tension and improved the packing efficiency.

Technical Parameter:

- Carton size: L200-500 W150-400 H100-150mm
- Table height: 750±50mm
- Capability: 600-720 ctn/hour
- Machine Dimension: 2000×2300×2000mm
- Power: 220/380 50/60Hz
- Pneumatic: 5-6kg/cm³
