

Automatic Sticker Labeling Machine ES-RB

Available to label on the square, round or flat object in medicine, food, grain and oil, cosmetics and other industries. Have the positioning labeling function for round bottle, and have the advantage of long-term durability.

Functions and Features:

Use the as the flexible symmetrical double chain as the bottle's correction mechanism, make sure the state of bottles are consistent and correct before entering the labeling mechanism. Servo motor style double-side labeling machine. The system of double-side labeling machine automatically detects the actual size of the being pasted object, make sure that labeling finished by many processes without bubbles, such as mainly to label, labels are confirm that mainly to label, labels support by the scraper blade, sponge roll extrusion, etc. Top string regulation equipment makes the operation of changing bottles with different sizes more simple and convenient. Designation for flat, square, irregular surface and curved bottle to make sure the labeling accuracy and effect.

Technical Parameters:

- Object size: diameter 15-120mm; height 20-300mm
- Label size: height 15-300mm; width 15-150mm
- Labeling speed: 10-200B/min (labeling speed is available to adjustable, related to the material and label size)
- Labeling accuracy: ± 1 mm
- Power supply: 220V50/60HZ 0.75KW
- Machine size: (L) 2440mmx (W) 1300mmx (H) 1700mm
