

## *High Speed Alu Alu Blister Packaging Machine SED-260GP*

The blister packing machine is a machine adopts in the lead position of quality, good capability, all-round function, good reliability and high productivity. It adopts auto-controlling technology and uses new material, new craft, and new technology to make the structure more reasonable.

### **Feature:**

1. Plate-type universal feeder although easy and not high effective, it is very extensively applied and suitable for large size and small size capsule, various tablets and pills.
2. High speed vibrating feeding. The feeder can suitable for any speed of the machine. Our Vibration Feeder adopts Stainless Steel tube for feeding, Suitable for GMP Standard.
3. High-precise servo stepping. The machine adopts Servo Motor for Running. So the speed adjusting and running will be more accuracy.
4. The machine is equipped Double Sealing makes the Sealing Perfect, no air run through the seal.

**Main Technical Data:**

Speed (Standard Plate 80mm×57mm×3)	60-180 cut/min	
Capacity	10800-32400 strip/hour	
Scope	20-250 mm	
Max. Forming Area	260*250mm	
Max.Depth	12mm	
Pre-Heating Power	2KW(×4)	
Heat Sealing Power	3KW	
Servo Motor Power	0.75KW X 2	
Main Motor	1.5KW	
Power and E-Consumption	Three Phase 380V 50HZ(220V 60HZ)14.5KW	
Air Consumption	≥0.6m3/min	
Packing	PVC	0.25x260mm
Material	PTP	0.02x260mm
Overall Dimension	3130x975x1850mm	
Size after packing	3900x1220x2150mm	
Weight	3000Kg
