

Continuous Electromagnetic Induction Sealing Machine GF1500/2000

Continuous electromagnetic induction sealing machine non-contact heating, plastic bottles, glass bottles and a variety of plastic bottles of aluminum foil sealing, in line with GMP standards. The maximum sealing diameter of 40mm, sealing high efficiency, easy operation, high and low adjustable design, can be suitable for a variety of high-level container sealing packaging wide adaptability, is the pharmaceutical, food, beverages, health products, cosmetics, grease and other chemical products The best selection of packaging technology.

Products are desktop, wiring and on-line. Can be used with automatic assembly line production or independent use. All stainless steel shell, beautiful, adjustable power switching power supply, digital display, advanced AC speed motor, closed-loop CVT, intelligent conveyor belt, automatic detection and diagnosis.

Name / Specification	GF1500	GF2000
Power supply voltage	220V / 50-60HZ	220V / 50-60HZ
Power	1.5KW	1.5KW
Sealing speed	0-12m / min	0-12m / min
Seal diameter	φ20-φ40mm	φ20-φ100mm
Production capacity	≤150pcs / min	≤150pcs / min
Maximum load	3kg	3kg
Adaptation bottle height	40-300mm	40-400mm
Weight	38kg	38kg
Dimensions	900X420X600mm	1150X480X400mm
