

JC-250 Cellophane Wrapping Machine

The High Speed Makeup Box Cellophane Wrapping Machine is used to supply packaging items by the storage or conveyor belt, from the paper (film), cutting paper (film), folding, packaging, heat sealing, shaping, discharging and a series of institutions to complete the packaging of packaging items. The two sides are folded and bonded by heat sealing, so as to achieve the packing effect of sealing, moisture-proof and decoration. Transparent paper (film) with a printed text and text or holographic light removal logo folding line (commonly known as gold line, open line), after adhesive paste. It is convenient for folding and anti-counterfeiting of finished products.

Description:

This machine is a general equipment for 3d packaging of different specifications of cardboard boxes and packaging materials with cellophane and OPP coating. This machine is designed by our company to absorb the same products at home and abroad. It takes the mechanical linkage mechanism as the main body. It adopts stepless frequency conversion speed regulation and automatic control electrical auxiliary equipment, which integrates machine, electricity and instrument, and has the features of compact structure, beautiful shape, convenient operation and maintenance, small size, light weight and high degree of automation.

Technical Parameters:

Models	JC-250
Production efficiency	40-60 (package/Min)
Range of Package size	(L)40-200mm×(W)30-120mm×(H)10-50mm
Power Supply	220V 50—60Hz
Motor Power	0.75Kw
Electric heating	3.7Kw
Dimensions	2700mm×975mm×1490mm(L×W×H)
Weight	880Kg
Application	Single-box or multi-box(item-package)
