

Automatic Continuous Plastic Bag Sealing Machine with Coding Printer FR-900V

FR series continuous film sealing machines finish continuous carrying, sealing and printing in one operation. Suitable for small-bag packaging, this continuous band sealer uses an electronic constant temperature control system and a stepless speed adjusting transmission mechanism.

This machine can handle various types of plastics and includes an embosser to imprint your expiration date, etc, save labor and improve efficiency.

It can seal plastic film in various kinds of materials such as polyethylene, polypropylene & polyolefin, etc.

The machine offers vertical or horizontal configuration. Horizontally model is usually used for dry food while vertical model is used from liquid sealing.

Specifications

| Model | FR-900V |
|----------------------|---------------------|
| Sealing Width | 6mm-12mm |
| Sealing Length | 0~Limitless |
| Film Thickness | 0.03-0.8mm |
| Prining Words Number | 39 |
| Sealing Speed | Max. 12meters/min |
| Temperature Range | 0~300°C |
| Conveyor Size | L 775 x W 140 MM |
| Conveyor Load | Max.3kgs |
| Power | 500W |
| Voltage | 220V 50HZ/110V 60HZ |
