

Tube Filling And Sealing Machine MZH-PAFS

This Tube Filling And Sealing Machine is made of high-quality stainless steel 316L, which is suitable for cosmetics, chemical, food, pharmaceutical and other industries.

Details introduced

1. This Plastic Tube Filling And Sealing Machine adopts mechanical structure, stable operation, fast speed, good effect, low noise, simple structure, convenient operation and maintenance, low failure rate.
2. The Complex Tube Filling And Sealing Machine adopts the hot air heating system formed by imported fast and efficient heater and highly stable flowmeter, with firm sealing, fast speed, automatic intubation, automatic positioning, PLC control, accurate positioning, date printing, equipped with plexiglass dustproof cover.

Technical parameters:

| | |
|------------------------|---|
| Filling volume | 10-1250ml |
| Filling accuracy | 0.5%-1% |
| Production capacity | 35-80 pcs/min (according to the material different) |
| AirPressure | >0.8Mpa >0.14M ³ /MIN |
| Aluminum Tube Diameter | 16-50mm |
| Motor Power | 1.5KW |
| Working Positions | 16 |
| Voltage | 50HZ 220V |
| Over diameters | 2100 x1020 x2300MM |
| Gross weight | 850KG |
