Instant Printing Stick Mark Machine

Widely used in electronics, packaging, logistics, supermarkets and other industries; Application examples: the barcode label of the corresponding model is attached to the mobile phone box, the corresponding serial number label is attached to the logistics scanned items, and the corresponding model label is attached to the air conditioning box, etc., which effectively improves the production efficiency.

Features

· using the imported zebra-brand industrial printing engine, the printing speed is fast, the printing is stable and the font is clear.
· the labeling head is controlled by the high-precision servo motor of the famous factory.
· double-stage test clutch design makes the label tensioning force more stable and improves the labeling accuracy.
· the control system adopts Siemens and is equipped with a touch screen display. Chinese and English bilingual operation interface.
· the labeling head is easy to adjust, and the labeling speed and conveying speed can be tracked synchronously.
· transmission line speed, tape speed and marking speed can be set and controlled on the touch screen.

Product specification:

Models	CY - 070 p
The printing speed ：	20 m/min
The marking speed ：	1-50 m/min
Labeling accuracy ：	±1mm
Maximum magnanimity ：	130mm (can be designed and made separately according to customer's requirements)
The weight of the equipment ：	180KG
Apply label paper roll ：	Φ 76.2 mm inner diameter
For maximum Φ label paper roll diameter	330 mm
External dimension ：	2000×700×1400mm
Use power ：	220V, 50Hz, 1500W
