

FFS Machine

FFS Machine is an assembly-line product packaging system. These machines make plastic bags from a flat roll of plastic film and simultaneously fill the bags with product and seal the filled bags. There are two types of FFS machines namely vertical form fill seal (VFFS) and horizontal form fill seal (HFFS) machines. Our machines have user-friendly controls made with modern technology equipment's such as microprocessor/PLC etc.

Features:

- Easy operation without the help of any technician
- Corrosion resistant
- Parts in contact with products are made up of S.S.
- Excellent performance
- Robust and durable machine
- Noise free operation
- Heat / Ink Batch Coder
- PLC Controls
- Pneumatic sealing mechanism

Applications:

Our Form fill seal machine is extensively used by many industries for packing

- Granular products like pan Masala, detergent powder, sugar, salt, tea, granulated coffee powder etc
- Free flowing powders like flour, talcum powder, baby food, milk powder etc.

Technical Specification:

Speed	30 to 35 packets per min.
Volume	10 gm to 250 gm 250 gm to 500 gm
Power Consumption	½ HP Motor, 240 V, 50 Hz Single Phases
Dimensions	1200 x 950 x 2200 mm
Net Weight Approx	250 Kgs. (Approx)
