

SL-130 Round Bottle Labeling Machine

SL-130 Round Bottle Labeling Machine adopt imported electromagnetic clutch with precision. High class aluminum alloy anode treatment has long service life. Adopt famous factory electric engine to ensure high load and long period operation. All parts and standardized components are carefully made by adopting stainless steel. With PLC control panel, liquid crystal display has the sense of the items. Imported label inspection optical coupler can ensure high precision. It is applied to the labeling of round bottle containers with small quantities but many.

Technical parameters

Model	SL-130 Round Bottle Labeling Machine
Voltage	AC22V 50Hz
Power	150W
Label dimension	Maximum:120(W)×400(L)mm Minimum:10(W)×(30(L)mm
Rnd bottle dimension	Maximum: 125mm , Maximum:20mm
Label inner core dimension	Internal diameter 75mm external diameter 300mm
External dimension	580×680×860
Net weight	45kg(including code machine)
