

ZH-100 Automatic Box Packing Machine (Small Box)

The machine is suitable for packaging pharmaceutical products, foods, cosmetics and daily products, such as blister package tablets, blister package pills, granules in 4 side sealing bags, bagged powder, plaster paste, lipstick, facial mask, milk tablet, 4 side seal wet wipes, etc... and so on.

Product Description

Production flow: Inner materials – loading materials – enter conveyor – box charger – opening box – box transfer – fill material (paper charger – fold paper – add instruction paper) – lot number printing – sealing box [Tongue insertion/Spray glue] – box output conveyor – finished

The machine can be used alone, or be linked with other devices (become a production line)

Technical Parameter:

Grammage	Between (250-450) g/m ²
Carton Size [mm] (L×W×H) (Special customized available)	Length: 55-220mm Width: 15-90mm Height:15-65mm
Inner Product size [mm]	Less than box size, Approx. 3-5mm each side
Steady production speed	30 - 75 cartons/min
Dimensions	3100×1100×1900mm(L×W×H)
Weight	1500kg
Standard power supply	Single phase 220V 50/60Hz
Power consumption [KW]	1.5KW
Air consumption	120-160L/min
Compressed Air Pressure	≥0.6MPa
Noise	<70 dB
Sealing style	Tongue insertion(mainly)
