

## HYVF-F VFFS Vertical Powder Packing Machine

VFFS Vertical Form Fill Seal automatic packaging machine is a new type packaging machine developed for large-capacity packaging industries of agricultural, foodstuff, pharmacy, fertilizer etc. Vertical Form Seal automatic packaging machine integrates bag-forming, filling, sealing, cutting, printing, punching, counting, etc. into one, its packaging rate can reach 25~80 times/minute. The kernel control section of the packaging machine adopts PLC and touch screen. The automation degree and operating reliability of this system has reached domestic advanced level. In addition, this packaging machine can realize quick changeover between continuous bag packaging and separate bag packaging, thus improving flexibility of field use. It can be connected with material elevator, output conveyor, metal detector, afterward-packaging equipment to form a fully automatic packaging streamline.
