

Vertical Continuous Sealing Machine DBF-900LD

DBF-900 series sealer is suitable for sealing plastic pouch packaging. It has electronic temperature control and stepless speed transmission, automatic continuous sealing plastic films of various materials. According to customer need, the machine can assemble coupled indentation marking wheels and counting device.

Advantage:

1. Electronic constant temperature Control: adopts electronic constant temperature control system and speed adjusting transmission mechanism, it can seal plastic films of various materials and different shape, it can be used in different packing line, and the sealing width has no limit.
2. Be fixed different date with different sealing effect: can be equipped with printing wheel, and free to change the characters, at the same time, it will print the date of the factory, shelf life, storage period, etc. The pattern and writing are clear and beautiful, and comply with food hygiene regulations.
3. Wide application: The machine is suitable for the sealing of aluminum foil bags, plastic bags and composite bags in food, medicine, pesticide, chemical and other industries.
4. High sealing strength: The machine has the advantages of strong sealing and high efficiency. Simple structure, small size, beautiful appearance, advanced technology, low power consumption. Simple operation, convenient maintenance, it is an ideal sealing machine.
5. Both solid and liquid are applicable: The machine has three types, horizontal, vertical, with stand can be chosen. Horizontal fit for the packaging of solid objects. Vertical fit for the packaging of liquid objects.

Features:

1. Adopt novel design idea and advanced manufacturing technology, which makes structure of machine more reasonable and perfect.
2. Print the colorful label while sealing in high speed and adhesive property.
3. Print the clear words/letters with various selectable colors.
4. Constant temperature control and temperature is adjustable.
5. Stepless speed regulation.

Applications:

Widely used in Food, Pharmacy, Chemical, Commodity, Seed, Pesticide and other industries.

Technical parameters:

Model:	DBF-900LD (floor)
Power supply voltage:	AC 220V/50Hz 110V/60Hz
Total power:	500W
Sealing speed:	0-12m/min
Sealing width:	8mm,10mm
Sealing center to conveyor:	10-40mm
Temperature range:	0-300.C
Printing type:	Emboss
Load weight of conveyor:	≤1kg (Single) ≤3kg (Overall)
Dimensions (L * W * H):	800X420X1000(mm)
Weight:	38kg
