

Single Head Filling Capping Machine

This capping machine has one manipulator, dispatches caps in high speed with no reverse caps which can be suitable for various types of bottles.

The cap supplying system and the manipulator works at the same step. When caps capped well, the bottles and the caps are relative static, the clutch releases, this can avoid bottles getting injured to achieve high qualified rate of capping. The surface of machine is made of high quality stainless steel, the electrical elements use international famous brand which makes machine more stable, good-looking meets GMP standard.

Technical parameter:

ITEM	PERFORMANCE
Machine Dimension(L*W*H)	2000mm*1000mm*1780mm
Suitable caps	Can be customized
Suitable containers	Can be customized
Capping Heads	Single head capacity)
Production capacity	≤2500b/h
Power supply	AC 380V,50Hz
Machine power	1.5 kw
Air operated source	0.6Mpa clean and stable compressed air
Weight	About 580k
