

## *DPP-120 Automatic Blister Packing Machine*

DPP-120 high speed al/plastic blister packaging machine, the machine is an advantage at home and abroad for innovative plastic packaging machine design, machine key parts of the company a number of innovative technologies. Packing for the pharmaceutical industry, tablets, drugs, capsules, also packaged foods and small metal parts, electronic components. The machine set coil unwinding, aluminum feeding, blister forming, filling materials, waste recycling, plastic heat sealing, printing batch numbers, textured indentation, forum cutter display counting ten functions in one machine, packaging materials good seal, safety and health.

### **Technical Parameter:**

Item		Parameter
Cutting Speed		10-40 times/min(AL-PVC)
Capacity		10-80 sheets /min
Stroke Range		30-100 mm
Max. Forming Area		120x90mm
Max. Forming Depth		20mm
Power Supply and Total Power		380V 50Hz 8.5KW
Main Motor Power		3.8KW
Cooling system		Condensate or water cooler
Packing Material	Medicinal PVC	(0.25-0.5)x120mm
	PTP Alu-foil	(0.02-0.035)x120mm
Machine Dimension (L×W×H)		2070x650x1060mm
Machine Weight		560Kg
