

NJP-8200 Automatic Hard Capsule Filling Machine

NJP-8200 automatic hard capsule filling machine is a new and large capacity machine. It's our company independent design at the basis of many years research and production for capsule filling machine. It's a ideal product for the user who pursues one large production with single species.

Performance advantage

Five point adjust device has been simplified which make it easy to clean the powder and increase the filling precision of the powder. The machine adopts PLC to control electric system, and the operator run the machine through touch screen. The stoppage could show on the screen, human-computer interaction.

Main Technical Data

Model	NJP-8200
No.of die orifice	58
Max output(capsule/hour)	492000
Vacuum	-0.08~-0.04 Mpa
Capsule number	00#-5#; (safety A,B)
Filling percentage	≥99%
Filling difference	Capsule≥0.30g
	weight variation:<±5%
	Capsule<0.30g
	weight variation:<±7%
Idle load noise dB(A)	<75
Power	380V 50HZ 15KW
Size L*W*H(MM)	1798*1248*2200
Weight (kg)	4500
*Data printing function, pellet device, dry vacuum pump (for your choice).	
Re: No additional information noted if there is any changed caused by the technical development.
