

Pharmaceutical Powder Blending Machine VI-180

This V shape Mixer Machine is mainly used for mixing powder or granular materials in food, chemical, pharmaceutical and other industries. Unique v shape geometric structure, can achieve efficient uniform mixing. There is no dead corner and no residual material in the mixing process. This Mixing Machine is equipped with a unique stirring paddle, which can mix the raw materials which are caked or contain certain moisture.

Technical Parameters:

- Model: VI-180
- Application: Powder
- Max. Loading Volume (L): 108
- Weight (KG): 320
- Dimension(L*W*H): 1730*650*1700
