

QGB2Y Bag-on-valve Gas Filling Sealing Machine

QGB2Y bag-on-valve gas filling&sealing machines suitable for green products packaging (water-based). It functions compressed air filling and sealing and then does line pack of the raw materials. It is fast in speed, precise in filling volume and good in airtight seal, and the required inflation pressure can be adjusted at will.

Technical Parameters:

Applicable valve	1 inch (25.4mm)
Filling Aerating	800-1200 pot/ h
Filling Accuracy	$\leq\pm 0.03\text{MPa}$
