

ZXJ-120 Automatic Case Packing Machine

This product is widely used in pharmaceutical food and daily use chemical industry to automatically pack the case and sack and various kinds of cubic product into the box. It adopts air cylinder to be the action executing component. It can realize the coordination of each part's action by the light and photo-electric control. The use and adjustment is easy. Operation safety and reliable. It can guarantee the quality of the product and can raise the production efficiency and reduce the intensity of labor.

Main technical parameters:

Production Capacity	15 bags/min (according to the size packaged things)
The Size of Finished Package	Min: 100×80×60mm Max: 300×200×200mm
Work Pressure	0.6-0.7 Mpa
Air Consumption	180 L/min
Motor Power	10 KW
Noise	Q65 dB(A)
Overall dimensions	2880×1130×170mm
Weight	600kg
