GS-SP PE Bag Packing Machine

Application

The machine can combine with weighing system: such as multi-head weighing machine, measuring cups device, manual feeding conveyor, spiral dosing machine) it can automatically complete all the packing processing, from measuring, feeding, making bag, filling, date printing, finished product output.

Feature

1) Imported PLC fully computer-controlled system, ouch screen is intuitionist and easy to operate with different languages; show you the working state and operating instructions.

2) Vacuum film transportation system, it will more stable, placidly and quickly, small friction, little waste. Coordinate with Photoelectric automatic positioning tracking system and High positioning accuracy.

3) Intelligent digital temperature control system, make the temperature control more stable, Horizontal sealing and Vertical sealing with air-blowing device, make the heat sealing momentary cooling, to make sure the

4) PE sealing looks good, solve the problem of inappropriate Sealing shortcomings for PE film, because it will shrink when exposed to heat.

5) PE packaging film is a low cost, environmentally friendly, it is a trend, which use for packing.

6) With automatic fault alarm display function, Such as, If the temperature is low, no packaging film, no ribbons, no material, servo failure, colorless standard signal, Will automatically alarm or shutdown feature when Glass protective door open.
