

DLS60-60-15R Washing Filling Capping Machine (3-in-1)

The machine is mainly applied for the filling of beverage. Integrating with washing, filling and sealing, it realizes full automation in the whole process, suitable for polyester bottle and plastic bottle filling of mineral water and purified water. The bottle types applicable for various parts are easily, conveniently and rapidly adjustable. It adopts new isobaric pressure filling, stable and reliable. Compared with the machines of the same specification, the productivity and benefit of this machine is larger.

The machine adopts advanced OMRON programmable logic controller (PLC) to control the automatic running of the machine. The input bottle adopts air conveying device; the output bottle adopts adjustable speed way, which combines with the transducer of the host machine making the output bottle running more stable and reliable. The photoelectrical inspection of the running condition of various parts makes a higher automation and convenient operation. It is the ideal first-choice equipment of beverage manufacturers.

Technical Parameters:

Washing Workstation	60
Filling Workstation	60
Capping Workstation	15
Production Capacity	22000B/H (500ml)
Machine Power	11kw
Machine Weight	18000Kg
External Dimensions (L*W*H)	6300(mm)* 4400(mm) *3000(mm)
