

Vacuum Band Sealer LF1080B

Packry@ LF1080 Sealing Machine (Vacuum Function) is a new generation designed machine include vacuum, seal and print functions. The machine has simple and novel structure, beautiful appearance; fashionable, complete functions, high automation, and can greatly reduce the labor intensity of operators. The utility model has the advantages of safety, reliability, simple operation, high vacuum, fast heat sealing, beautiful and firm sealing, etc.

Recommend: food, cosmetics, agriculture, pharmaceuticals and chemical industries.

Features:

- Thicker and wider heating block & cooling block to ensure the quick and perfect sealing
- High precision processed driving wheel, much beautiful
- High-quality solid rubber tensioning knob, wear proof
- Unibody gear box, flank fixed, more steady
- High-quality polyformaldehyde gear with high- strength injection molding, Running more smooth and low noise
- Patent to replace the sealing belt, which is easy and convenient
- Shield on the machine to ensure the safety of the operator
- Conveyor can be easily adjusted up, down, ahead or back according to the size of the products
- Elegant panel, easy operation, variable speed conveyor
- Can with the gas filling, the filling time is adjustable
- The new choice of the vacuum pump to ensure the high degree of vacuum
- "AirTac" filter can prevent the products (such as small granule ,liquid) into the vacuum pump
- The height is adjustable, tilt degree Max with 15 degrees

Specification:

Model	LF1080B
Voltage	110/220V/50~60Hz
Function	Air Suction, Gas Flushing, Bag Sealing, Printing
Power	875W
Sealing speed(m/min)	0~12
Sealing Width(mm)	6~12
Temperature range	0~300
Max. thickness of single layer film (mm)	≤0.08
Max Loading of conveyor(Kg)	≤3
Machine size(L*W*H)mm	1020*480*(925+140 adjustable)
Weight (Kg)	84Kg
