

Automatic Vegetable Seed Packing Machine CK-720K

This automatic seed packing machine is upgraded according to the characteristics of the seed, which is suitable for different kinds of seeds, for example grain seeds, vegetable seed, sunflower seed, mustard seed, etc

Seed Packing Machine Features:

- This machine adopts computer control and English-Chinese touch screen system, which makes the operation of the machine more convenient and can effectively reduce the difficulty of operation.
- The packaging style of the seed packing machine can be implemented in a variety of packaging styles. Customers can choose the corresponding packaging process according to their own requirements.
- The high-quality photoelectric switch (electric eye) is used to detect and position the color code printed on the packaging material, so that the finished product can obtain a complete trademark pattern (Intelligent photoelectric color mark positioning control system can automatically eliminate the abnormal color mark pattern. And the impact of interference signals caused by poorly printed packaging materials, stable and reliable operation)
- All parts of seed packing machine in contact with the packaged material are made of stainless steel or non-toxic materials, in line with the hygiene standards of the food industry and the pharmaceutical industry.

Model	CK-720K
Packaging Materials	OPP/CPP OPP/PE NILO/PE PE
Maximum Metering Range	10L(Can be customized)
Bag Size	W200-350mm; L400mm(Can be customized)
Packaging Speed	5-50bags/min
Maximum Width Of Roll Film	720mm(Can be customized)
Voltage	220VAC/50HZ
Power	5KW
Size	1700L*1350W*1950H(mm)
Weight	700KG
