

## Automatic Chocolate Wafer Packing Machine CK-ZS450X

The automatic wafer packing machine has a very close connection with the packaging of the food industry, as the technology developed, we also improved the machine, make the wafer packing machine more faster, more stable, more efficient, and can be applied to different packaging materials.

### Automatic Wafer Packing Machine Use:

This machine is suitable for all kinds of biscuit, bread, candy, fruit, vegetable, paper box or tray, etc.

biscuit

chocolate

vegetable

bread

soap

fruit

## Automatic Wafer Packing Machine Features:

- Frequency control, convenient and simple.
- Sliding horizontal seal mechanism can adjust the center height of horizontal seal arbitrarily.
- The special adjustable bag-making device can better adapt to the current packaging requirements of multiple varieties and specifications.
- The differential feeding mode makes it convenient to adjust the feeding position during the operation of the wafer packing machine.
- The advanced color standard detector makes the color standard detection more accurate. You can choose any sealing mode of reticulation, straight grain or vertical grain.
- The wafer packing machine advanced microcomputer packaging controller, excellent man-machine dialogue mode, so that speed, bag length, tangential point position detection can be directly displayed on the interface.

## Wafer Packaging Process:

1. Manually place the material on the feeding device.
2. The film transport device automatically transports the film.
3. When the film passes through the bag forming machine, the former makes the film into a bag.
4. When the shaped bag passes through the longitudinal sealing device, the longitudinal sealing mechanism seals the back of the bag.
5. After sealing the bag and passing through the transverse sealing and cutting device, it starts to be transverse sealed and the packaged finished products are automatically output.

Model	CK-ZS450X
Film width	Max 450mm
Bag width	50-180mm
Product height	Max 80mm
Film diameter	320mm
packing speed	40-230bags/min
Machine size	4020*820*1450mm
Weight	1050kg
