

## **JA-750A Vertical Pneumatic Instantaneous Heat Sealing Machine**

The machine to double cylinder work for the pressure, sealing, cooling between the use of time relay control, precise adjustable. Suitable for chemical, food, medicine, cosmetic and other industries packaging materials, large packaging plastic bags firmly sealed.

### **Introduction**

JA-750A series of large bag sealing machine is to adapt to the needs of different industries and the latest development of the latest development and production of pneumatic vertical seal instantaneous large packaging and sealing machine, the machine for chemical, food, medicine, cosmetic and other large packaging industry seal. Sealing solid, smooth and beautiful.

### **Product Parameters:**

<b>Model</b>	<b>JA-750A</b>
Voltage	AC220/50Hz
Total power	250W
Air compressor power	User-owned
Bag height	450-750mm
Maximum sealing load	50kg
Adjustable angle of indenter	20°
Package Size	720×560×1340mm
Gross weight	90kg
