

Double Chamber Vacuum Packing Machine DZ/2SD-series

Double Chamber Vacuum Packing Machines are equipped with two chambers. While products are being packed in the first chamber, the second chamber can be unloaded and loaded again. This makes the packaging procedure especially efficient. Double chamber machines are easy to operate, clean and service. They offer the highest output on the smallest footprint and also provide impressive performance over their entire machine life thanks to their production output and pack quality. The evacuation and gas flushing processes are time-controlled and thus guarantee reproducible packing results.

Technical Parameters:

Model	Vacuum Pump	Name	Dimension	Power
DZ-400/2SD	20pump*1	Double Chamber / Stretch (304 Stainless Steel)	1120*498*960mm	0.9KW
DZ-500/2SD	20pump*2	Double Chamber / Stretch (304 Stainless Steel)	1460*610*960mm	1.5KW
DZ-600/2SD	20pump*2	Double Chamber / Stretch (304 Stainless Steel)	1460*610*960mm	2.25KW
DZ-600/2SD	20pump*3	Double Chamber / Stretch (304 Stainless Steel)	1460*610*960mm	2.25KW
DZ-700/2SD	20pump*3	Double Chamber / Stretch (304 Stainless Steel)	1645*705*965mm	2.25KW
Customization:				
1. The machine is customized to your product size.				
2. Private custom, high packaging efficiency, good vacuum effect.				
3. The vacuum pump can be selected according to the size of the machine.
