

CCE-ZH-200 Automatic High-Speed Cartoning Machine

ZH-200 Automatic High-speed Cartoning Machine was modified based on the similar imported machine with our own innovations characteristic of pneumatic-photo-electro-mechanic integration with high performance and complies with GMP requirements. The machine runs successively and horizontally with max. capacity of 200 boxes/min including automatic box open, leaflet folding, embossing, sealing, detection and rejection, etc. It's suitable for packing blisters, tubes, bottles and similar shape of goods like in pharmaceutical, food, cosmetics, chemical and hardware industry. It can also be linked with Blister Packing Machine, Filling Machines Shrink Machine, Three-Dimensional Packaging Machine or Box Machine to form a production chain.

Technical Parameters:

Encasing speed	120-200(box/min)
Box	Quality requirement:250-350g/m ²
	Dimension range(LxWxH):(50-220) x (20-90) x (14-70)(mm)
Leaflet	Quality requirement :50-65g/m ²
	Unfolded leaflet specification :(LxW):(80-300)x(70-210)mm
	Folded leaflet specification(l-4):(LxW):(70-21 0)x(20-40)mm
Compressed air	Working pressure:0.5-0.7mpa
	Air consumption:6.0m ³ /h
Power supply	380V 50HZ
Motor power	2kw
Overall dimension	4010x1200x1700mm
Weight	About 2500kgs
