

Automatic Granule Paste Multihead Weigher CBW-1A11(16)

Automatic Granule Paste Multihead Weigher is special design for Paste, extra one hopper in order to increase the speed, for regular products, 10 head weighed may meet the demands of speed 35-60, but the shape of Paste is difficult to run that fast, so we add an extra bucket on it.

Remaining features of standard 10 head and 14 head weighed, we could increase the speed for weighing special products.

Features

- ◆ New actuator design reduces the mechanical vibration and improves the accuracy of load cell.
- ◆ Each drive board is independent, can be changed freely, even in different weathers.
- ◆ Friendly HMI, similar with mobile phone operation icons, make operation more easily and simple.
- ◆ Weighers with strong self-checking function, can realize the closed loop testing, real-time detect abnormalities in each node, and real-time display in human-machine interface.
- ◆ The software versatility, strong compatibility, different weathers using the same control system.

Technical Specification

| Model | CBW-1A11(16) |
|--------------------------|---|
| Single Weighing range | 10-1000 gr |
| Avg. Accuracy | 0.5~2 gr |
| Production wpm | 65 wpm |
| Control panel | 7 inch color touch screen |
| Hoppers Volume | 1.6L (single door), plain plate |
| Construction material | 304 Stainless Steel |
| Driving system | Step Motor |
| Control system | Modular control system |
| Power requirement | AC 220V/110V \pm 10% 50Hz (60Hz) 1100W |
| Options | Dimple plate/timing hopper/printer/rotary top cone/multi-mouth top cone/reject device |
| Packaging dimension (mm) | L1650*W1070*H1110mm |
| Gross weight | 420kg |
