

GDM32-0.8 32 Heads Multihead Weigher

- Three layers of hoppers: feed hopper, weigh hopper and memory hopper.
- Achieve more combinations, higher accuracy and higher speed.
- Maximum speed up to 180/min with one continuous vertical packing machine.
- Multiple discharge can working with tein or Multiline packing machine.
- Mixing two to five different products at high speed, compensation function achieve best mixing.

Feature:

1. Professional digital weighing modular with high precision and good stability.
2. Operation authorization set-up in HMI; 16 languages to be selected, application software upgraded through USB.
3. Restoration function of factory parameter. 99 product parameters can be preset to meet different parameter program requirements.
4. Weighing hopper able to discharge in turn, effectively prevent products from blocking.
5. Real-time display of amplitude of each vibration pan as well as product weight in each hopper to better monitor the running status of machine.
6. Machine body with SUS 304/316 for option, IP65 dust and waterproof design.
7. Cleaning Function: able to let the hoppers stay in opening for easy daily cleaning and maintenance.
8. Modular design of control system for easy maintenance and cost-saving.
9. 2-6 blended product weighing.
10. Able to keep good ratio precision of each blended product and high accuracy of the total

Specifications:

Model	GDM32-0.8
Version	4
Bucket number	32
Weighing Range	15g~500g
Min Scale	0.1g
Max. speed	60WPM,300WPM
Hopper Volume	0.8L
Operating interface	10.4 inches color touch screen
Power supply	220V,50/60HZ,4kW
Application	Snack, Foods, Puffed Foods, Granules
