

SPX-1 Automatic Single Head Capping Machine

SPX-1 Automatic Single Head Capping Machine is new production, developed by factory. It equipped positioning plate for interval running, capped by double magnetic moment rotating heads. The machine has practicability in field of pharmacy, pesticide, chemical, and foodstuff. It's ideal equipment for bottle capping. Also applied to seal aluminum cap, anti-theft cap, screw-thread cap. High qualified ratio of cap handing and rotating (sealing). Plate positioning, convenient to change size, large range of adjusting. Bottle feeding and exiting fluently, frequency conversion control speed. Compact structure, easy operation and maintenance. Magnetic moment cap rotating, tightness may be adjusted freely, not damage the bottle and cap. Continuous operation, completing automatic production, saving time and improving benefit. The whole machine is designed according to requirements of SPX.

Technical Parameters:

Model	SPX-1
Production Capacity	1800-2400 bottles/hour
Bottle Size	20-1000 ml
Capping Head	Single Head
Optional Screw Cap	Diameter 12-70 mm
Optional ROPP Cap	Diameter 16-36 mm
Capping Accuracy	> 99%
Noise	< 70 dB
Power	220V, 50Hz, 0.8Kw
Packing Size	2000*1000*1500 mm
Packing Weight	650 Kg
