

AT-FDT Turntable Powder Filling Machine

AT-FDT turntable single-head filling machine is a new generation of quantitative packing equipment researched and developed by our company based on the foreign advanced technology, in which touch screen in Chinese, (human machine interface), PLC, electrical and mechanical system are applied. It has high measuring accuracy, low failure rate and stable and reliable performance.

Features

1. Touch screen in Chinese (HMI): various operations and functions display make the operation simpler.
2. PLC: it can provide core control to complete various operating logic operation and fault detection.
3. Mechanical positioning: it completes the evolution from semi-automatic to automation, so as to improve the production efficiency and reduce the labor intensity.

It is applicable to quantitative packing for powder materials and small granular materials, such as veterinary medicine, feed, flour, milk powder, protein powder, additives, spices, laundry powder, white sugar, salt, rice, beans, solid drinks and other materials.

Technical Parameters

Packing specifications	10-2,500 g
Packing speed	0-30 bottles/min
Packing accuracy	0.5%-2%
Power source	AC380V 50 HZ (three-phase four-wire)
Gross power	≤2 KW
Dimensions (L*W*H)	2000*850*2200 (mm)
Gross weigh	300 kg
Ambient temperature	-10-40°C
