

## *NY-Y60 Bottle Can Jar dust proof lid Pressing Machine*

The machine is applicable for capping and various tin cans, aluminum cans, paper cans and all kinds of round cans. It is an ideal packaging equipment of food, beverage, pharmaceutical and other industry.

### **Features:**

1. The machine can automatically finish capping and impressing the cover, the production capacity is very high and the labor cost can be saved.
2. The design of operational panel is reasonable and simple and the operation is very easy. The machine automation is very high so it can be adopted for the part of the packaging system.

### **Technology Data:**

|                         |                     |
|-------------------------|---------------------|
| Production capacity     | 50-60 cans/min      |
| Applicable can diameter | 50-130mm            |
| Air supply              | 0.6Mpa              |
| Power supply            | 220V/50Hz           |
| Power                   | 500W                |
| Machine size (LxWxH)    | 1730mmx1080mmx196mm |
| Weight                  | 300kg               |
