

DXDS28 Horizontal Packaging Machine

Horizontal packaging machine is to pack bulk granular or powdery material into small bag, which can form various bags by changing a few components. This model adopts liner layout and sliced film bag-making, and realizes full-automatic packaging through online bag-making, coding (Zipper or Plastic nipple can be installed), bag opening, filling, sealing and other functions.

Specifications:

	DXDS28
Packaging Form	Standup pouch with round bottom, three-side sealing
	four-side sealing bag and irregular bag
PackagingSpeed	80-120 bags/min
PackagingAccuracy	Measuring cup metering: $\pm 4g, \leq 500g$;
	$\pm 1\%, > 500g$;
	Combined scale metering: $\pm 2g$
Roll Film Type	Paper plastic film, aluminum plastic film and other composite films
RollFilm Width	Max. 660mm
