## *Automatic Stick Noodle Making Machine GGMT9 Series*

Automatic stick noodle making machine is made from multiple sets of roller, automatically pickin gup and molding, assembly line production, high degree of automation, simple operation, high efficiency, safety and health. Only place the mixed flour on the conveyor belt. After the machine is turned on, it can be sent, kneading, pressing and folding automatically. It reduces the contacting times of the machine and human, no need for artificial feeding flour, eliminates the safety hidden danger, and reduces the labor intensity of the workers. Using light after pulley deceleration chain transmission, compact structure, convenient operation, strong power, low noise, high efficiency. The fuselage is made of high quality steel, roll surface made of high-strength alloy steel wire drawing, high strength, high pressure, durable, not out of shape.

This automatic noodle making machine can not only produce all kinds of noodles (noodles, grain noodles, vegetable nutrition noodles, colored noodles), hot dry noodles, chow mein noodles, hand rolling noodles, but also can produce dumpling skin, wonton skin and other products. Its product is thin and evenly adjustable, the surface is clean, the noodles are vertical, cooked quick, not paste the soup, not adhesion, continuous strip, good taste. Replace the cutting knife, which can be used to process a wide, narrow, different sizes of noodle. The product meets the hygienic standard, is ideal equipment for hotel, food processing factory, the unit canteen and the individual beverage industry.

**Technical Parameters:**

<b>Model</b>	<b>GGMT9-260</b>	<b>GGMT9-300</b>
Size of King Roller	140*260mm	140*300 mm
Capacity	260KG/H	300 KG/H
Power	6kw	6kw
Weight	1600kg	1700kg
Dimension	4600*700*1380	4600*730*1380
