

XFF-B Semi-automatic Powder Dosing Filling and Packing Machine

The machine can finish the process of dosing, filling, and alarm of the difference of the weight. The machine is suitable for packing powder material, such as milk powder, feedstuff, rice flour, sugar, coffee, monosodium glutamate, solid beverage, grape sugar, solid medicine, etc.

Character:

1. Chinese and English touch screen with PLC control system.
2. The machine use the servo motor to push the auger, the precision is high.
3. With Side open hopper, the machine is made of stainless steel and meets the GMP standard.

Technical Parameter

Packing weight	10-5000g (The screw attachment can be changed)
Weighting range	1-6000g (with a resolution of 1 g)
Packing precision	≤1%
Packing speed	15-60bag/min
Power supply	380/220V 50-60 Hz
Power	1.5kw
Weight	260kg
Dimension	1000×1300×2200mm
Volume of the hopper	560L for oversized hopper
