

**SHENZHEN PENGLAI**  
SINCE 2003

## **YX-CP100 *Fully Automatic Folding Cartoning Packing Machine***

### **YX-CP100 Fully Automatic Folding Cartoning Packing Machine characteristics:**

- The machine adopts PLC control, frequency inverters control speed, electrical element are all used international famous brand.
- Adopt human-machine interface.
- Automatically displaying device for malfunction, cartoning speed and finished products counting.
- Automatic check the neglected cartoning and waste picked out for products and leaflet.
- It is easy to understand and operate, work stably.
- It doesn't inhale leaflet without products and doesn't inhale box without leaflet.
- It idles and doesn't push products if there are no products or products supply does not reach the designated position. Machine will work automatically with reinstatement of products supply.
- It stops automatically if there is no box or continuous no leaflet.
- It is easy to replace different products.
- The machine can be used alone, besides, it can be linked to work with blister packing machine, bottle filling machine and heat shrink packing machine.

YX-CP100		
PROJECT		PARAMETER
Encasing speed		30-120 case/min
Box	Quality requirement	250-350g/m <sup>2</sup>
	Dimension range (L× W× H)	(50-180)mm* (30-85)mm* (15-50)mm
Leaflet	Quality requirement	50-65g/m <sup>2</sup>
	Unfolded leaflet specification L× W	(80-300)mm*(70-210)mm
	Folded leaflet specification(1-4)*(L× W)	(70-210)mm*(20-40)mm
Compressed air	Working pressure	0.5-0.7mpa
	Air consumption	120-160L/min
Power supply		220V 50HZ
Motor power		1.5kw
Machine dimension(L× W× H)		3200mm* 1200mm* 1900mm
Machine weight		1500kg
