

## High Speed Rotary Type BOPP Hot Melt Glue Labeling Machine

The Reliable Rotary opp labeling machine is a new labeling machine with continuous operation. It is mainly used for cylindrical bottle labeling of OPP, pear film composite paper and other rolled material labels. New environmentally friendly materials such as opp film are used to minimize production costs and save more than 30% production costs. At the same time, the use of environmentally friendly packaging materials is a trend in the development of the packaging industry. The labeling is driven and controlled by servo motor. All electric sensors are imported from Japan with advanced photo electric, advanced configuration and PLC HMI. This machine has the advantages of fast labeling speed, high accuracy, stable performance, convenient operation, beautiful and flat appearance. The capacity of the machine can reach 16000BPH.

### Technical Parameters

Type		
Labeling data	Label length	10-330mm
	Bottle diameter	50-106mm
	Label material	OPP feed roll paper
Machine data	Main engine Power supply	AC 3 phase 220-380V
	Main engine Power	10KW
	Junction line error	±0.8mm
	Capacity	Max. 16000BPH
	Overall Size	4000*1500*1800mm
