

PB-1800D Horizontal Automatic Double-Bag Packing Machine

APPLICABLE PRODUCTS

- Juice, detergent, softener, other relevant liquid products.
- Sugar, chocolate, jelly, other relevant irregular products.
- Coffee, cocoa, condiment, other relevant powder & granular products.
- Widely used in Food, Pharmaceutical, Agrochemical, Cosmetic & Personal care and Others.

MACHINE FEATURES

1. Horizontal filming

Horizontal filming provides enough space for different in feeding modes, suitable for all kinds of packing materials.

2. Improve Packing Quality

Especially for powder packing, dustproof can reduce the powder effect on sealing.

3. Good Looking

Intermittent sealing, good looking, improving product image.

4. Easy to Adjust

Free of change-over parts, more convenient to adjust packing size.

5. Less Replacement Parts

The structure is optimized for long time continuous operation, rarely need to replace parts.

MACHINE FUNCTIONS

- Suitable for powder, granules, liquid, viscous body.
- Suitable for sugar, tablets, capsules, pills, pellets.
- Can be integrated with counter, multi-head weighing machine, measuring tray.
- Can be used with steel seal, hot-pressing printing and heat transfer printing.
- Can choose the 3-sides or 4-sides sealing way.
- A custom-made machine can add a zipper to the mouth of the bag.
- Can realize diamond tearing area and the line- tearing area.
- European hole available.
- A custom-made machine can achieve self-supporting bag.
- Sealer can achieve lattice pattern, stripes or plain.

Technical Parameters

Model	PB-1800D
Measurement	±1%
Reel Diameter	500mm
Power Consumption	4.5kW
Air Consumption	0.7 m³/min
Weight	750kg
Machine Size (L×W×H)	3360mm×970mm×2150mm
Single-pouch Packing Size	180×220mm (max.) 50×60mm (min.)
Double-pouch Packing Size	90×220mm (max.) / 50×60mm (min.)
Single-pouch Output	40-80 bags/min
Double-pouch Output	80-150 bags/min
