

## ***DXDC8IV Automatic Tea Bag Packing Machine***

Automatic Teabag packing machine model DXDC8iv is newest generation machine whose functions include filling, heat sealing, threading, labeling and overwrapping. This machine adopts sealing pads to replace the sealing rollers on old machines. The new system greatly improves machine's flexibility for different packing materials and will supply best teabag package. Many kinds of packing material will get good performance on this machine such as paper/P.E, Plastic/Foil/P.E, Plastic/P.E etc

### **Technical Parameter**

| Model                  | DXDC8IV             |
|------------------------|---------------------|
| Output                 | 105±5 bags/minute   |
| Max. dosage            | 8cm <sup>3</sup>    |
| Bag dimensions         | 62.5mm×50mm         |
| Envelope dimension     | 80mm×70mm           |
| Tag dimensions         | 28mm×24mm           |
| Thread length          | 210mm               |
| Power Supply           | AC380V/220V         |
| Total Power            | 2.36kW              |
| Weight                 | 1210KG              |
| Overall dimensions     | 1.688m×1.33m×2.205m |
| Packing box dimensions | 1.84m×1.29m×1.89m   |
