

ZHDP-1924B PLC Controlled Piston Filling Machine

Piston Filling Machine Manufacturer From China. Liquid One Stop Packaging Solution. 2-16+ Head Inline Fillers, Custom Built for Your Specific Application and Budget, Contact. One Stop Solution. High Quality Manufacturer.

Major Characteristics

This type is an advanced rotating piston filling machine. It based on special ring guide rail to push liquid cylinder working. So, this type has high measurement accuracy high filling speed, wide filling size range. Little noise, long service life element, easy operating, easy maintaining, high reliability, it is used international famous brand electrical components, the outer parts and all the components that will get in touch with the filling material are made of high grade stainless steel, also applied to GMP standard requirement. It is the best choice for large or medium scale enterprises.

Main Performance Parameter

Power Supply	AC 220V; 50Hz (or according to client voltage requirement)
Power	2.2 KW
Filling Volume Range	50ml—500ml
Production Capacity	50ml \leq 8000/hour
	500ml \leq 5500 bottle/hour (take water for rest)
Error Range	< 1%
Container Size Range	Height 120mm—250mm Diameter: 50mm—100mm
Machine Weight	1050Kg
Machine Dimension	(L×W×H): 2000mm×1400mm×2350mm
