

Powder Filling Machine

This powder filling machine is specially designed for filling and sealing different bottles with powders. And it is quite suitable for large volume filling and sealing of big bottles.

Features:

1. With PLC to control the turn number of the metering screw, it features accurate metering and stable performance.
2. It can automatically stop filling if there is bottle missing.
3. Precise metering, reliable performance, and high automation degree.
4. PLC control and one-button switch make this powder filling machine easy to operate.
5. With many detachable components, it is easy to maintain.

Main Parameters:

Production Capacity	4800~7200 bottle/hour
Applied Package	0. 2~3g and 3-100g
Package Accuracy	+ - 2~5%
Rate of Sealing	≥99%
Electric Supply	380V/50hz, 3phase
Power	2kw
Size	3100×1300×1800mm
