

BCS-M Semi-automatic Capping Machine

The container cap closing equipment is semi-automatic capper. It is suitable for object container with plastic screw caps.

Design with mechanical torque limit device to prevent over capping which damages the cap appearance.

Specification

Model	BCS-M Semi-Automatic Capping Machine
Cap type	Plastic screw-on cap, Snap-on cap
Working Capacity	20-40 bottles/min (Based on operator's speed)
Power Consumption	220V single phase, 50/60HZ
Air Consumption	15L/min @ 6 Bars
Machine Dimensions (LxWxH)	456x450x1445 (mm)
Machine Weight	50KGS
